

Starfloats - Finn Slough

Park at the west end of Dyke Road, beside the entrance to the dog park or at the bottom of No. 4 Road and walk to the end of Dyke Road. If you look carefully you will see the Starfloats hidden in the trees near the point, above the "No Wake" sign and to the east of it. The phosphorescence will charge with sun/light and the Starfloats will softly glow for 2 - 2.5 hours after dusk. They will slowly fade as the charge wears out. The Starfloats are also visible during the daytime.
